TO CAPITALISTS.

A FRENCHMAN, who is desirons of return ing to France, offers for sale an establish ment for the founding of silver and lead ores. The establishment is known by the name o

the OJO DE AGUA, and is situated in the mountains of the Province of Cordoha, and distant about 20 leagues from the capital of that Province.

Since its foundation, about 35 years ago, this establishment has enriched various members of a French family many years resident in Cordob. About two years ago the then proprietor died, and since then the establishment has not been wrought, but the working of it is likely to be resumed in the course of the next fifteen days.

Monsieur Echat, a French engineer, who visited the establishment and made assays of the sited the establishment and made assays of the 'escoria' speaks particularly of the latter in a report made by him.

Besides these assays n a le by Monsieur Echat, those have been others made at l'Ecole des Mines

there have been others made at the color designated de Paris &c.

In view of them all, the 'escoria' ought to yield a minimum of 4 marks of silver to every casion of 200 arrobes and 15 to 20 per cent. of lead. Founding the escoria, and with good work, this operation alone ought to leave a cl-nr 160,000 (sixty thousand Bolivian dollars) clear profit.

The 62 ablishment embraces all that is necessarily emphasized what for sorting purposes, and and to be sold along with the establishment there are the three-fourth parts of ten silver mines known to be the richest in the Province of Cordoba.

The escape on the Western Railway on Wednesd v is still the subject of great comment, and will, in all probability, lead to the laying of a double track. It was suggested on Change to day, that, owing to the enormous traffic at present on that line, the goods trains should travel in the night, and the suggestion meets with great accentance. Sr. Terrero, who has just arrived down from Mendoza, gives a room chamber of the state of the st

every stop on the road where the diligence halted the most wretched accommodations for travellers were to be had. All the staple articles for consumption, and most of the staple products of Mendoza, come and go on muleback across the Andes, and yet the construction of a short rail-way from Rio Cuarto would divert this entire trade, and bringto Buenos Ayres the richest products of the Interior. Mr. Terrero is of opinion that as soon as this railway is constructed the business at present transacted in the Plaze Constitucion and Once de Setiembre great and important, though it be, is but a bagatelle when compared with the trade which will be then open to us with the upper provinces. All the present 'portreros' of the Boca will be hardly sufficient to form the market place for Argentine provincial produce, which with the development now going on, we may look for in a very few years, brought down to us by rail and coastwise. It is difficult yet to say where the great provincial market will yet be located, but the conveniences for shipping and the wide and unoccupied area of land lying between the foot of Calle Defensa bill and the Riachaelo, point to that locality as the most de

sirable for the purpose.

# Bristol's sarsaparilla

Is prepared in the most scientific manner, by thoroughly educated chemists and Druggists, who have had many years' experience. It is not a simple extract from one article, but is compound, ed of extracts from a number of Roots, Herbs Barks, and Leaves, all of which are possessed of some particular virtue or power in curing the diseases that have their sourse in the blood and bumors; these different vegetable extracts are combined in such a way as to retain, in as full strength, the spec al curative virtue possessed by each. The root of the Sarsaparilla plants found in Honduras, is that which we use in this preparation; it is the kind which all medical man esteem moss. About, fifty per cent. of Bristol's Sarsagarilla consists of the concentrated extract, the remainder, as above stated being composed of extracts from other powerful, cleans-ing and healing vehetable substances. It does not contain any thing that is dagerous or inju-rious to health, and in this, as in nearly every other respect, is entirely different from all other preparations sold under the name of Sarsapa-rith.

rilla.

By having our own agents at he places where the various roots, drugs, herbs and plants, composing our medicines, are produced, we are enabled to exercise that constant care in selection which insures uninformity of excellent, and we spare no money and no effort to procure the best—and only the best—of every article entering into their composition; and it is with the most abiding confidence we say, to be sick of all nations and all countries, that, in Bristol's Sar saparilla you have a remedy more reliable than any before offered to you, and which will no diappoint eyou in the cure of. appoint uyou in the cure of. As a means of building up the consiitution that has been broken down by the excessive use of Mercury, Iron, or other Minerals, our Sarsaparills will be found most excellent, and can be administered with safety to the weakest patients. As a purifier of the blood and humors, in the Spring and early Summer, it will the tound unfalling. It can be taken freely at seasons, rainy or dry. For some of the above diseases, the use of the Sarsaparilly must be continued a considerable time, especially for those that are hereditary or constitutional in their nature—such as Seredula: but a mithful compliance with the difference will always relieve and mitigate, and in a geent majority of cases will effect a complete cure. It will also be found, in all of the above diseases, that a cure will be greatly haoted by using our Bristol's Sugar-coated Pills, in moderate does, in connection with the Sarsaparilla; they carry off legacy quantities of meridians. using our Bristo's Sugar-coated Fills, in moderate Joes, in connection with the Sarsaparilla; they carry off large quantities of morbific or dinased matter set free in the system by the Sarsaparilla, and in this way facilitate the return to cormal functional operations.—cj.—
