Monsieur Echat, a French engineer, who visited the establishment and made assays of the escotial speaks particularly of the latter in a report made by him.

Besides these assays made by Monsieur Echat, there have been others made at l'Ecole des Mines

In view of them all, the escents dignet to yield a minimum of 4 marks of silver to every cajon of 200 arrobes and 15 to 20 per cent. of lead. Founding the esceria, and with good work, this operation alone ought to leave a clear \$60,000 (sixty thousand Bolivian dollars) clear profit.

The establishment embraces all that is necessary for surviving withous the formacting purposes, and sary for making shot for sporting purposes, and to he sold along with the establishment there are the three-fourth parts of ten silver mines known to be the richest in the Province of Cordobs.

THEY NEVER REAPPEAR.—Eruptive and deceptive maladies are banished for ever by Bristol's Sarsaparilla. They never re-appear, either in their original shape or in a new form This is not the case when mercury or any other mineral agent is employed. Suppressed at one point, the disease crops out at another. In many oaces it is transferred from the surface to the bones, or from the external fleshy fibre to the vital organs. The secondary symptoms which so often follow morcarial suppression, are as dangerous and as obstinate as the original disease. This great vegetable depurative does not drive back the diseaser, or scatter its sends through the system. It is an extirpator. Wher work is done it is done thoroughly. [cj-029]

portant matter, which must be remelied before we can arrive near the ob ect we have in view. On the East side of the Plaza Lorea the streets are narrow, badly paved and dirty; on the West they have the dvantage of being broader, and may

eventually become very fine.

They are all open to improvement which may be performed as follows:— 1. The foot walks should be widened so as to allow of at least four persons passing abreast, without fear of one being crushed against the wall, or 'shunted" off the pavement. Crinoins are not very monstrous affairs now-a-days, and a foot or two taken from the road, and added to the footwalks would render the latter more agreeable, without doing any harm to he former.

2. The walks should be well paved with flag-stones confined with a kerb, and raised a foot from the road. 3. In such parts as the walks are considerably above the level of the road, proper steps should be made at the crossings instead of the break-neck

apologies now existing.
4. The road instead of having a gutter down the centre (which gives it the consequence of a subaltern's blunthe appearance of suffering from a der, trop de zele, and the acquitment cramp) should be raised in the mid- of M. It could be done by building the river-wall 30 or 40 feet farther out; from the Plaza 25 de Meyo to a line with the Plaza Retiro, or as near to it as possible; levelling the space between escape to the river; and marking out the carriage drives walks &c. by rows of trees.

eaguo square, just outside the town where few or no houses are yet built.

This should be enclosed by rails and be laid out in carriage drives and walks; the spaces between, should be sown with grass seed and planted with various kinds of trees; the trees should not be planted in rows but scattered all over the spaces not occupied by

the drives or walk. Here again should be drinking-fountains and statues. The public should not be admitted intil the grass was well grown, and the rees well advanced.

Park-keepers should be appointed to ook after the grounds and keep order. These are a few of the requisites to ender B. Ayres beautiful.

It will take time to accomplish these improvements, but in the end no body will regret having contributed his nite, towards beautifying this city, which for what we know, may one day be, one of the finset in the World.

The Contribucion Directa this year has produced 210,000 \$. for Montevideo, and it is proposed to establish a new cemetery at the Buceo, which President Gomensoro will inaugurate in a few days. This kind of an inauguration is out of my line at present, and I hope will be longer so.

The Edinburgh Castle entered Montevideo on Saturday, having left Valparaiso on the 10th inst. but brought no papers or mails as it was expected the Chimborazo, which is a very swift boat, would arrive here before her. Not only has the indefatigable Mr. John Bucla, of the Telegrafo, been left without papers this time, but even the Chilian Consul has received none.

A meeting of the sharcholders of the Mutual Gas Company took pince on the 24th, in the sacon of the Alegria Theatre, for the purpose of increasing the capital to \$f.1,000,000, or say \$220,000, and for general business. Dr. Beccar, the president of the company with reference to the contracts with the Municipality and the contract or, Mr. George Bowers, of London. On the matter being put to the meeting the increased capital was unanimously agreed to.

Several sharcholders spoke of the excellent business.

was unanimously agreed to.

Several shareholders spoke of the excellent business the directors had in hand, and the large number of persons present showel that the public had great interest also in its progress. The chairman stated that the company would start with 4200 public street-lamps, which would be augmented to 6000 in three or four years; and as the contract with the Municipality did not terminate until the 1st March, 1884, the future of the company was all that could be desired. This Establishment has recently been enlarged and improved by the addition of the adjoining house, and may now claim to be one of the largest, as well as the best furnished in South

America.

The great reputation it enjoys is the best guarant e of the excellence of its work.

Conducted on the most modern and approved principles, furnished with the finest instruments principles, furnished with the linest instruments and best accessors s, and in continual communication with the first Photographic Galleries in Europe and North America, it has unapproached facilities for producing the highest order of artistic photographs.

Our first aim in producing a photograph is to make a likeness, the next, and almost equally important one, to make a pleasing, and artistic higher.

picture.

We leave the public to judge whether in this particular we have been succe-sful. In connection with our Establishment, we have opened a Gallery of

Choice Oleo-graphs, Principally copies from the works of celebrated Italian, English, and American Artists.

In Landscapes alone our assortment is one of the Largest ever exhibited in this City, and particularly noticeable for its exquisite views of Californian scenery.

This branch of our business we have intro-

ti ularly noticeable for its exquisite views of Californian scenery.

This branch of our business we have introduced entirely for the extertainment of persons who are unavoidably obliged to wait a sitting, and the low price at which these pictures are marked will sufficiently prove the truth of our assert on.

Our hours of business are from 10 to 5.

It is at all times desirable that an engagement should be made one day in advance.
