OUR MINING INDUSTRY.

The mining industry of the Argentine Republic is, notwithstanding all our progress, in its infancy...

In the hope that something good may come of this concession, and that the hidden treasures of Patagonia may yet become an article of Argentine export...

Report on the Patagonia Mines. 1. The mountains in which these mines are situated are known as the Sierra de Patagonia...

2. The mines are about 7 leagues from the town of Chelchico in the province of Rioja...

3. The mining knowledge on the part of the native inhabitants has always been, and still is, very limited...

4. When once at surface the ores are picked, and the best sent on muleback to the proprietor's house...

5. There are some old and crushed to gether mines which, judging from the pile of stuff near the collar of the mine...

6. During the revolutions some years ago, I should have told you, in many of the wells to do inhabitants were either killed or driven away...

7. Many of the mines are on the off-shoots of the mountains, on lodes running, some E and W, others S. E. and N. W.

N. W. across the general run of the country.

The lodes mostly run nearly parallel and are generally not more than a few fathoms apart.

8. I have taken some general samples and arranged for them to be forwarded to Buenos Ayres.

9. The facilities for mining in this district I consider very great.

10. For a company the primary and principal outlay would be for roads, trams, buildings and machinery...

11. These preliminary works over, I feel convinced that the results would be everything that could be desired...

12. When I consider that operations have been resumed about two years only, many of the natives, notwithstanding their primitive modes of working...

13. The lodes and veins, as I have before stated, are very numerous and close together...

14. This mountain is an offshoot of the main range, and the lodes, running across the general run of the country...

15. This is the most northerly worked on in this mountain. It runs east and west, and is about 2ft. wide.

16. Is about 14 fms. south of the San Pedro. The ores are also remarkably rich, more so even than the other...

17. Is separated from the Esperanza by a ravine; is said to have been very rich, but the late proprietors having lost the lode suspended operations.

18. This is about 17 fms. S. from the Pilar; there are however several smaller veins intervening, which have been neglected for the more important ones.

19. This is a large mountain southward of Caldera, and contains, I may say, hundreds of mines, and principally, or rather the larger number, on different lodes.

20. At surface the formation is a gossan, but in the present bottom, about 25 fms., the lode has improved in size, and is of a highly mineralized nature.

21. In this mine there are two well defined lodes, one about 4 feet and the other about 6 ft. running E. and W.

22. The lode in the bottom gives a large quantity of ore yielding about 500 oz. per ton.

23. This is a large mountain southward of Caldera, and contains, I may say, hundreds of mines, and principally, or rather the larger number, on different lodes.

24. The fine, square, two-storey building at the corner of Calles Bolivar and Caseros is too well known to the residents or even visitors of Buenos Ayres to need a detailed description.

25. The learned Prof. Ramorino, taking this for his text, expatiated in eloquent terms on the merits of the institution, which was a standing monument of the wealth, importance, and high morality of his exiled countrymen.

26. The band played the National Hymn, followed by the Italian, as we adjourned to the refreshment-room.

27. Being in the vicinity of the following towns and villages, viz. Chelchico, Patagonia, San Miguel, Maggista, Nonogasta, Bichigasta, Sinigasta, &c.

28. Pastures are abundant and good consequently it is easy to maintain live stock for work and for consumption.

29. Pastures are abundant and good consequently it is easy to maintain live stock for work and for consumption.

30. Roads between Chelchico and the mines at present are only passable by mules. They would have to be put in order by a company.

31. Mr. Ireolar requests us to state that not having had the necessary instruments for carefully examining all the mines, the various distances, angles of dip and underlie &c. must be taken as only approximate.

32. The concession by the Rioja Government we shall publish to-morrow.

THE ITALIAN HOSPITAL.

The ceremony of Sunday was one of the most imposing that has ever been our duty to assist—nothing more or less than the re-dedication of the Italian Hospital, begun some fourteen years ago...

The Coribola police have captured the miscreants who murdered the President of the Municipality of Villa Nueva, Sr. Cordeiro, some months ago.

Don Juan de la Cruz Salguero has just died in Coribola at the ripe age of 90 years. Some kind of a pot-horse election row is reported from Parama, and three or four foreigners got damaged in the melee.

We have late Iosario papers, but they contain not a word of news. It is probably the death of the article that obliges the Capital and the Alvarico to 'pitch into' each other as they are doing.

Trusting to your impartiality for the insertion of this, I am, Gentlemen, Yours truly, F. SHORT.
