THE STORM.

The rain storm yesterday morning was, whilst it lasted, the sharpest ever experienced in this city. The storm hardly held an hour, and yet in 60 minutes the whole town was inundated.

There was no street or sidewalk or post; everything was covered. Some one suggested why not pole the tramway car out and let it float down to Calle Paraguay.

Had all the authorities of the city—lock, stock and barrel—been popped into a Lacrosse, a Billinghamst or a City of Buenos Ayres Tramway car yesterday morning, and bodily swept away with the flood for a few squares or so, perhaps some stir would be made to adopt proper measures for carrying off the storm water.

Paris Letter. (Our Own Correspondent.) February 8th. The conversation everywhere is on the financial world, that is, those members of it who have not had time to bolt, and those put under bolts.

Had the storm held 30 minutes longer no man could measure the unutterable woe that would have followed.

At 8.20 a.m. the tramway left Flores for town, partially filled. There were in the car Messrs. Ferrero, Montesdeoca, Manson, Mendez, and some few others.

The plight of the townfolk yesterday morning, who were compelled to leave their houses at an early hour to reach their offices, was something surprising.

The companies that have stopped payment belong to the usual bubble type, and found mutual sympathy in common misfortune.

Public opinion is commencing to show a little of its indignation at the conduct of the committee of Thirty, in its Labor of Love, to keep M. Thiers out of the Tribunal.

We pulled along as best we could until up at the Lorea when we reached us of danger and to take care. What care a man could take in such a moment was not specified.

home politics; he is but playing the majority, while gathering up the millions for the indemnity; but he will take care that no party shall be in power to influence the nation, when the moment comes for the nation to elect new deputies.

A new journal has appeared—the National Assembly; its object is to prove that a republic is an impossibility, which is quite true if one of a radical character be meant, but quite wrong, if a Conservative Republic be understood.

In the late execution of the three Communists at Satory the soldiers, for the first time on hearing the signal word "fire," did not raise their rifles.

There is a very capital squib published in one of the illustrated journals. It represents the Assembly on me of its boisterous days, when all the deputies speak at once at a shake their hats in each other's faces to show their dissent.

The play of 'Oncle Sam' has been interdicted. I met an American who read two acts of the five, and asserts it is a filthy diatribe on the Americans.

The high pressure praise and abuse heaped on Napoleon the Third's memory having become exhausted, the cold, incisive opinion of France can now be ascertained.

Some of the new Postal Cards have been strangely abused—made into a sort of political tract; on the back the virtues of every kind of Government are acconically printed, so that it is deemed desirable to throw a paper pellet at the head of an adversary, it is only requisite to write his address.

The recent execution of the three Communists has produced a very bad effect in Paris, in those quarters where it was desirable to heal wounds still fresh.

Messrs Gebbie and Dadds, the emigrants of Calle Defensa, offer the public a chance...

An ordinary meeting of the Saint Patrick's Society will be held this evening at No 18 Calle Reconquista...

A Buenos Ayrean who has been dawdling about Europe for the last six months writes to us as follows:—I never witnessed a more wretched sight than the arrival of the last French prisoners of war...

The following, from a North American paper, will interest our scientific readers:—Prof. Edwin J. Houston, while spending a summer's vacation in Pike County, Pennsylvania, discovered the sensitiveness of water to sound waves...

We have received from a much esteemed subscriber some fervent lines on the virtues of 'native beer'...

There are unpleasant reports afloat that the 'conventillos' are again overcrowded. So terrible is the squeeze in some of them that even the roofs and patios are crammed with sleeping humanity...

There is nothing particular going on in Rosario. A press jury case against the 'Merced' comes off to-day; the impecunious Dr. Fresh is the judge...

The 'Courier de la Plata' proposes the amalgamation of all the Tramways in town in the hands of one Company, that the rails be placed in the middle of the streets...

Valparaiso colleague recounts the following hoax played on a citizen of credit and renown:—A bogus advertisement was published lately in the native daily, 'El Independiente'...

There was far more mud than news yesterday. Several of our rather large staff of reporters had narrow escapes of being drowned while out on their morning rounds...

It is stated by M. Tatro, the inventor of a process for the purification of petroleum, that he has added sulphuric acid (from 2 to 4 per cent) and 4 per cent of dry lime, agitating the oil with it and distilling...

Yesterday a distressing report that yellow fever has broken out in Rosario reached town. So much for quarantine breaking. There is a very uneasy feeling in town about this violation of quarantine...

storms; still the yield in one of our colonies that of Tortugas, was very fair, and little wheat was destroyed by the rains.

I think there can be little hesitation in pronouncing this the whole a most favorable country for the production of cereals, only there are contingencies, not so much of climate or soil as of circumstances attending inevitably the growth of a new country.

The fact is it is a most erroneous idea to settle down as a farmer with the belief in making a fortune. A farmer rarely makes a fortune in any country. The true wealth of the farmer, and it is the most enviable wealth in the world...

But much remains to be done in this country before the Argentine farmer is placed in the same position as the English or American farmer, in reference to agricultural facilities.

After carefully looking into the quarantine arrangements of this Island, I have come to the conclusion they may be summed up as 'Share and share alike' together.

Should any one be taken with fever, there is no suitable building for the sick—no hospital separated entirely from the other buildings!

Fortunately we have a jovial crew here, or the time would hang heavily as it is, the day is spent something like as under:

THE FAR SOUTH Ajo, March 1st 1873 Dear Messrs Editors of the 'STANDARD' Seeing so long a time has elapsed since my last letter you may correctly be supposed to think that little out of the ordinary course of events has occurred...

A public want has recently been supplied in the shape of a small steamer which has been put on to run between Ajo and Buenos Ayres. I believe the owner has received a concession from Government and should it be anything like punctual in its goings and comings will be greatly appreciated...

When I perhaps may furnish you with an account of my adventures aboard 'Comanche' comes a corresponding increase of crime of all shades and degrees from the petty thief to the audacious murderer...

The only event occurring within the last few days that has caused any stir was a Bull Fight which took place on Carnival Sunday in one of the Calle Corrales in connection with Señor Casals Saladero.

This ended the great bull-fight, and I expect many long days may elapse before such another spectacle is repeated in General Lavalle. I cannot understand how that the Juez de Paz could take it upon himself to grant permission for such a performance to take place...

I must take my leave of you, as I am afraid to exhaust all your patience with a longer letter. In the mean-time, I remain, Yours truly, LEX.

HOW I FOUND QUARANTINE Flores Island, Montevideo, March 7th 1873. After carefully looking into the quarantine arrangements of this Island, I have come to the conclusion they may be summed up as 'Share and share alike' together.

decey be seen, in consequence of letrados and laborers being insufficient, and as a climax—the other day six fair, tall French beauties were bathing perfectly naked in the river, and this within a 100 yards of the buildings and amidst the admiring gaze of some of the opposit sex.

The medical officer in general presides at the head of the table but on the evening of this last occurrence, he vacated his seat and publicly gave his reason for so doing.

There was a dull gloom on 'Change about the news from Montevideo notwithstanding that some telegrams stated that the sickness is greatly exaggerated the official news is bad, and fears are entertained that the sickness is spreading down there.

On Friday 700 arrobes of washed wool from Entre Rios will be sold by auction in the barraca of Messrs. Torres de Barry and Co. This wool was saved from the wreck of the Catalina Salada and sold by order of the underwriters.

On next Tuesday Mr. Vivar will sell a square league of camp in the Partido de las Flores. If necessary, the land will be put up in four lots.

On next Monday Mr. Gowland will sell half a league of land in the Partido de Baradero. The sale is judicial, and the valuation 251,000 dollars.

ing the shipping for 100 per day. One vessel that left this port in ballast to load in Rio lost almost every soul on board whilst at anchor in the bay. This we have from the highest authority.

The French mail Rio Grande (dates to 24th) entered Montevideo to-day. The Bontia (in quarantine) sent her passengers off this morning in a lighter to Encarnacion just before the storm. The poor people were caught in the torrent, and there is much anxiety to hear of them.

The Topographical Department has sent to the government a very excellent report from their engineer, Mr. Gorman Kuhn, upon the very disputed question of the Rosario railway route passing the Capilla del Señor. From this document it appears that the change in the route proposed by the company has been necessary, and is preferable to the first line proposed.
