It being an admitted fact, that "Money make money," the object of LA BIENHECHORA could not be better, since it opens a vast Saving Bank for the surplus or savings of the Public and by the proper employment of these smaj gains, a moderate capital, or, aven annuity, may be secured in a short time. By this means a prosvident, though helpless, family can husband the mall means, and, in the end, attsin a competency.

A MEDICAL PHENOMENON.—Is it not amazing to see an invalid ganing strength, while under the influence of a purgative? Yet this is the case with every sick person who resorts to Bristol's Sugar-coated Pills. They open up the sy tem while expelling its impurities through the proper channel. In cases of dropsy they appear to stimulate the absorbents and to prevent the formation of water in the cellular tissues. How these results are produced, physicians must determine for themselves; but meanwhile there is abundant proof that dropmeanwhile there is abundant proof that drop sical affections as well as indigestion and bilious complaints are removed by their agency.

It would cost about 7 per cent. to collect and arrange the paper etc., or in all 70 millions of francs-a sum that would all but defray the cost of the new fortifications around Paris, and which M. Thiers can economise by making his countrymen wait a little longer for the evacuation of the territory. It was given to M. Thiers by Prince Bismarck to decide whether he would prefer giving up Belfort or allowing the German night-blooming Cerens. But besides army to occupy the Champs Elysees: M. The resale of some of the lands in the province of Santiago del Estero is announced, and the business is really deserving of note. Last year Mr Ebbeke, the popular auctioneer, sold in this market several square leagues of land to parties here The land was situate in the province of Santiago del Estero it sold for 5000 mic per square. lot containing seven square leagues, that cost but

The Santa Fo papers at hand to-day have brought down a very lengthened report of the inauguration of the Santa Fo rai.way. Mr. Zimmermann, the Governor, Sr. Fernaudez and others made speeches on the occasion. We hold over tal to-morrow the description of the inau guration. The new railway is being built by Mesers. Waring Bros. of London. The sale of the Republica newspaper and print-

ing office for the round sum of 140,000 pats. is line ever effected in this market. The Republica less very va uable, but the price paid covers very hand-ome figure also for the paper, which has been bought up by an electoral committee to free the paper from the control of its present of about eight years growth, and when first started took a great circulation owing to its cheap price, one dollar, and its general news Since then, however, many papers have been started at the same price, and newspapers as paying business have greatly fallen off, ther being very few papers in this city that give fair returns on the capital and labor, and very many papers that do not even cover expenses. In the hands of a very active and capable man, the Republica might possibly be worked up to a paying point, but the task is a hard one, far easier to drive up Bonds, Cedulas or chacra lots. Newspaper property is the most

perishable, and to give a good yield requires nore brains than capital; all the money in the Provincial Bank cannot make a paper a paying concern without the brains, and heated electors a wealthy and much respected estanciero of that brains are the very poorest description for such

The news from Paraguay is of a mixed cast a regards the rebellion. Caballero holds the whole country and has wherever he could made forced lavies on the little towns, he has fought and conquered the Government troops, but us to his taking Asuncion there is not the slightest probability. The Paraguayan Government has received advices from London to the effect that an arrangement of a satisfactory nature is being made with Mesers. Robinson Floming; this looks well. The Alsacians that have come out go up to the North to form a colony, a beak business enough. As regards General Mitre, it seems that already there is a hitch and a stiff hitch. The Paraguayan Government refuse to treat with the Argentine Republic until the Argentines first evacuate the Gran Chaco; this new resolve throws the fat again into the fire; possibly Geabilities will be able to remove the difficulty, Gold commands a high premium and the tramway people very properly now ch rge in silver and copper. Anything rather than paper, business in Asuncion is good, and large orders for comestibles have come down.

As an instance of the splendid value of camp property, we may state that ten millions currency have been offered to Mr Bell for a square league of land at Eusenada, facing the river, and refused. Three millions a league for three leagues of land near San Vicente-refused; and three milione a league for an estancia some four of land, close to Chascomus, also refused. These prices show to what splendid values really well situated lands have risen.

The Tiber is now looked for. Already she has number of passengers engaged, among others Mr Arthur For ester, Mr Mcoks, and several

Owing to some coal blunder in England, it seems that all the coke at the gas office is exhausted, and the coal that the company now uses gives no coke whatever. The sequel is a scarcity of coke in the market and a run upon the Lezica and Lanus gas-works for this most necessary article. The applications for coke at both gashou es show the great consumption of the article in this market

Messrs. Bullrich made a very clean sweep the auction line yesterday, sel ing splendidly the quinta Campana: sold every inch of it at the rato of \$67 m/c. per square vara.

The following were the buyers :rs. Arrendondo, Venturini, Urien, Alegrini, Gutierrez, Lopez, Olazabal, Campanella, Atre, Fermat, J. Graham, Parutti, Bruce & Co., Fabini, Berisset, Bocalandro, Langdon, Pinero, Gomes Machetti, Fe-ta, Barato, Duc and Gonzalez. They also sold -

No. 148, C lle Telcahuano, 81x35, for \$335,000 m/c. : B. Escot, buyer. Also, 524. Parque, 10x60, for 220,000 m/c.: C. Luichten, buyer.

Mesers, Rodriguez and Larrazabal sold th splendid property on the Flores road formerly Livingstone's, and now Bunge's. The wholplace sold and sold well, the plot facing on the Flores road, with 50 varas depth averaging 130 n/c, per square vara. The whole place realized 3,105,000 m/c. Buyers - Messrs. Eguzquiza, Salazar Rom, Livingstone, Guivino, Gom z, I't chart, Amorales, Gandara, Dalge, Brumlet and others. We congratulate Mr. E. Bunge on the result. Mr. Bungo when ho strikes always strike well.

The National Bank question is still the topic of this market, and all agree that Mr. Castro could not do better than to try and place in Lon don the five millions taken firm by himself and friends. Any other attempt at starting this bank will inconvenience this market.

The National Bank moved its offices to-day from Calle Florida to No. 36 Calle Reconquista up stairs), the site purchased by the Directors

The Bank of Mana & Co. are also persuaded that this new branch of their business will render immenses service to the working classes of Buenos Ayres and its neighborhood.

Buenos Ayres, 2nd January, 1867.

It is manufactured to suit Summer, Winter and Spring, and is only used for Railways, and Carts, Bullock Waczons, &c.

It consists of Nine different fluid oils and so-lidified by a chemical process. It will resist the hottest sun, and will not get into a liquid or fluid state. It is only when the action stops its again colabilles. It is of a suitable consistency, of recold lasting power, attended with but little increase of temperature even at the highest speeds, and leaves but the smallest usidue in the axle loxes. A request which is too firm will remain comparatively solid in the box, and allow the axle to become hot, whilst on the citier hand one that is too thin becomes exhausted by a few miles running. It is manufactured to suit Summer, Winter

running.
This Grease is of more importance than at first sight a pears; for while the grease account of railway companies forms no inconsiderable i.em of expenditure, the waste of motive p wer and wear and tear of plant entailed by the use of unsuitable greese is enormone.

The merits of the Grease, in its general utility

LUBRICANT, and also for its or the CHEAPNESS, was shown, when compared with other kinds bitherto used, that are entirely useless for any pur poss but that of lubrication. It is therefore much less liable to be differed and misapplied than tallow, lard, neats for the pilfored, a circumstance which induced the principal railway companies in England to adopt Yellow Grane for their protection and manufactured to suit European climate.
