Up to the present we have never before ex-erienced such a day in the Cedula market as F ur hundre d and eight thousand pats. in Cedulas sold during business hours; such a tremen ous business in one singl stock has perfect y stunned the market, and surprised even the C dula men themselves. The stock sold down to 9-4 cush, and the stiffened. In the liqu ation prices ruled tolerably firm, and buyers were off ring at 914, but at 4 p.m., the pressure was again folt, and the stock again ruled bab.

The saies to-day were simply stupendous, and the business for the end of the month is now of such magnitude that there is a "stand from un-der" feeling in the market. The banks and dis-counters have shut the stock. Good city bills counters have shut the stock. Good city bills' were done to day at 10 pec cent, whilst loans on Cedulas at 15 per cent, were positively decline. This shows how the wind blows. EDITOR'S TABLE.

The Royal Mail steamer Douro sails this afternoon. As we have before auconneed, she carries to the Eastern World a distinguished passenger list, and amongst its names is that of one whom all in this country, Argentines and foreigners alike, jestly delight to honour. Mr. William Wheelwright ails for Europe in the Douro for the benefit of his health. In saluting the veteran Industrial Pioneer of South American progress, and wishing him God-speed, a pleasant voyage, and a prompt restoration to health, we only cho the heartfelt wishes of the people of this country, of all nationalities. To all other friends, countrymen, lovers, acquaintances and subscribers on board we wish every pleasure on their trip. If they had the bespeaking of a steamer to carry them, they could not have a finer one than the Douro, nor more accomplished gentlemen and seamen than Captain Thwaites and his officers to guide their destinies while on the ocean wave. Safe home, ladies and gentlemen! A 'bientot!'

The Crisis.

The crisis in the Cognac Market is now at its height. Barran and Briet hold the market, height he sold Agents of Dupuy's famed Brandy in the Plate. The Bandy tightness is complained or by all the hotel keepers and contiteres in twe, and until a few more clarks are put on at the Lustom-house, a returning ease in the Brandy Market cannot be looked fer.

Guaranteed

Infallible for the Cure of Scab in Sheep.

After long and innumbrable trials, we have succeeded in pre-paring the above Sheep-dip, by the use of which we guarantee the thorough eradication of Scab in Sheep.

Besides cheapness and easy application, it has the great advantage over all other similar preparations of being COMPLETELY SOLUBLE IN WATER,

a circumstance which admits of our liquid penetrating to the very surface of the skin, without spotting the wool or making it adhere.

New Patent R.R. Grease YELLOW GREASE

Manufactured and Patented by RICHARD GAMBLE. Suitable only for this Climate

and Not for Europa.

It is manufactured to suit Summer, Winter and Spring, and is only used for Railways, Tramways and Carts, liullock Waggons, &c.

It consists of Nine different fluid oils and solidified by a chemical process. It will resist the hottest aun, and will not get into a liquid or fluid state. It is only when the action of the axles commences it becomes a rich creamy fluid, and when the action stops its ngain solidifies. It is of a suitable consistency, of good lasting power, attended with but little increase of temperature even at the highest specifs, and leaves but the smallest residue in the axles loxes. A grease which is too firm will remain comparatively solid in the box, and allow the axle to become hot, whilst on the other hand one that is

come hot, whilst on the other hand one that is too thin decomes exhausted by a few miles running.
This Grease is of more importance than at firm sight appears; for while the grease account s ratiway companies forms no inconsiderable itet of expenditure, the waste of motive power and wear and tear of plant entailed by the use of un-

suitable greese is enormous.

The merits of the Greese, in its general utility

LUBRICAN I,
and also for its
C H E A P N E S S,
are shown, when compared with other kinds hitherto assed, that are entirely useless for any pur pose but that of lubricatio.
It is therefore much loss liable to be piffered and misapplied than tallow, laid, neatsfort oily potro oil, rape oil or gallipole oil.
These oils always command a ready market if piffered, a circumstance which in fuced the principal railway companies in England to adopt Yellow Grease for their protection and manufacturoute suit European climate.
