The news from Montevideo of the German bank taking the Oriental loan and advancing the Montevidean Government 21 million pataone fairly astonished this plaza. The letter an from the Mount adverted to the ma ter, and the Telegrafo Maritimo, which is generally well in formed, corroborates the statement. The general impression is that the advance made by the bank to the Government must come from this market, at least for the first two or three months instalm nts, and this must necessarily affect our exchange market. The times are not the most favorable for such large operations, still as the Germans hold the gold of the world at present, there would be really nothing very surprising if this new Oriental loan were launched

in Berlin instead of London. Mr Thomas Jones, late manager of the London and River Plate Bank in Montevideo, left that city on Monday in the Lusitania for England. He was accompanied to the steamer by a large concourse of friends.

"There has been a total absence of discount demand at the Bank to day, and no further gold withdrawals have been made, all the telegrams from New York being at the same time favorab e and such as to indicate little chances of profit for any additional specie remittances from this ide. Under these circumstances the Stock Exchange markets have shown increased steadiness, and Consols, which opened at yesterday's prices -92% to 1-have closed at 92% exactly for delivery, and 923 for November. The Bank return published this afternoon presents the usual features of the period, aggravated by the gold movethe last two years at this date, while the proportion of reserve to liabilities, which at each of those periods was only just over 32 per cent, is now 33½ per cent. Of the reduction of £1,904,446 in the stock of bullion, £1,300,000 has been consequent on the foreign demand, the balance having been absorbed demand, the balance having been absorbed demand. ments to America and Germany, but the decrease ing been absorbed for home wants at the end of the quarter. Altogether these figures afford evidence that, but for the occurrence of the New York crisis, no change in the rate of discountwhich had stood at 3 per cent for the preceding five weeks-would have been found expedient. "Railway stocks opened at an improvement and subsequently still further advanced. In the afternoon, on the issue of the Bank return, there was a slight reaction, and the cl sing prices were
