provements viz.

Morrison's wenderful little Engine, for cleaning and exacataing decayed teeth, preparatory to filling, which does the work with such repidity and boutiful exactness, that in a very few see, ands an otherwise sensitive tooth is prepared for the Gold in a manner unatt inable by the difactecable method of recraping and burning, so well known by those who have experienced the operation.

Also Green's Else rie Engine, which took the gray d Diploms of Honor at the Vie nu Exhibition. The feat of harnessing lightning is fairly done in this neat, efficient, and truly wonderful little mechine. By this we manipulate the gold into the most difficult or fail too h, with the most exquisity exactness, and without langer of fracturing the most delicate enamel. Then, with the same engine, we finish and polish the filling in less than one quarter the time formerly required, and without cain. No patient who has had treth filled in this manner once, will ever will nelly consent to the use of excavators or burr again.

We have also received an immonso quantity of the most beautifully carved Arthered Posth, comprising thousands of different shads and forms, from which with our long practical experience we can match any style or feature, complexion, or expression, with such artistic niceness that dietection is impossible.

REAT EIRE AT DOCKHEAD.—On J April 23 a fire broke out at Messrs. Peak Frean, and Co's Biscuit Manufactory, at Dockhead, Bermondsey. The fire, which commenced about two, a,m., spread so rapidly that the efforts of the firemen rad to be chiefly directed to preventing the flames fr m extending to the adjoining premises. Then ighbor ring premises, right and left, and on the opposite side of St. Saviour's Dock, have suffered extensive damage both from fire and water, whilst the only portion of Messrs. Peet, Fr an, and Co.'s establishment saved from de truction is a small detached bluck and the conting-house and general offices of the firm. There is no clue to the origin of the fire. During, the progress of the conflagration five bar, es in the dock caught fire and were turned to the water's edge. Mes. rs. Peak, Frean, and Co. desire to inform their friends that the usual course of business will not be interfered with. No de ay will be oplace in executing orders, as all work will be one at their spacious premises at Drummond Road, to which their Dockhead worky ople have been transferred. During the prince of Wales, accompanied by the Duke of Sutherland, visits at the beene, and watched with great interest the operations of the firemen.
