GOVERNMENT MORTGAGE BANK

dates.

It pays Mortgags Curtificates (Cedules Hipoteorics) for the amixat of the loss it advances, which bear an interest equal to that collected by

the Bank.

The value of property offered in mortgage shall not be under two thousand patacons, nor the loan be loss than 600 (quetes.

No loan can exceed helf the value of the pro-

No loan can exceed half the value of the property mortgaged.
The Mortgager shall bind himself to pay an annual sum so long as the mortgage lasts, said aum to repre-ent the interest on the sum lent the amortization fund and commission to the Bank. This yearly sum shall be paid quarterly or half-yearly.

Series A—Quarterly.
Mortgage for 20 years 117 days, 8 per cent. nterest, 2 per cent. amortization, and 1 per cont. commission.

Series B-Quarterly,
Morgago, for 27 years 270 days; 8 per cont
interest, 1 per cent. amortization, and 1 per cent commission.
Series C-Half-vearly.
Morigage for 20 years 190 days; 8 percent, interest, 2 per cont. amortization, and 1 per cent

Series D-Half-yearly.
Mortgage for 25 years 5 days; 8 per cent
interest, 1 per cent. amortization, and 1 per cent commission.

Upon the tuilpayment of the yearly sums stipulated in the Mertgage, both property and
Mortgager shall be freed from all further obligation.
The Mortgagor shall be at liberty to anticipate

the payments and to discharge the mertgage; all or in part.

Applications for mortgages must be made in SAVINGS BANK.

Deposits in account current are received from \$250 mpc. to the largest sum.

Interest at 8 per cent, capitalized every three months.

Depositors will receive a Pass-book, showing how their account stands.

Applications for mostgages must be made in writing, specifying the property offered, accompanied by the ities down, the receipts of the Contribucion Directa tax, and setting forth that the property is free from all incumbrance, or it not the incumbrance that exists thereon, and which is to be paid off by the mortgage. The Secretary of the bank will supply applicants with the forms necessary as also the tables for amortisation.

the forms necessary as also the tables for amortization.

Quarterly mortgagers shall pay from 8th to 16th of each January April, July and October, and half yearly mortgagers shall pay between the 8th and 16th of each January and July.

With the amortization fund, mortgage cortificates (colucts) shall be redeemed at par by quarterly and half yearly drawings.

The mortgage Bank pays the interest on the quarterly cedules or mortgage certificates between the 31st December and 6th January, the 31st March and 6th April, the 30th June and 6th October

Secretary.

AMERICAN, &c. 

RODOLYO NEWBERY Brothers,

Associated with Don TOMAJ COQUET.

Having received several very important improvements viz.:—

Morrison's wonderful little Engine, for cleaning and ex-axiting idecayed teeth, preparatory to filling, which does the work with such rapidity and bountful exactness, that in a very few see; not an otherwise sensitive tooth is prepared for the Gold in a manner unant inable by the disacrecable method if coraping and burning

pared for the Gold in a manner unatt inable by the disarceable method if scraping and burning, so well known by those who have experienced the operation.

Also Green's Elec ric Engine, which took the grard Diploms of Honor at the Vie na Exhibition. The feat of harnessing lightning is fairly done in this neat, edicient, and truly wonderful little machine. By this we manipulate the gold into the most difficult or frail tooth, with the most exquisite exactness, and without danger of fracturing the most delicate enamel, Then, with the same engine, we finish and polish the filling in less than one quarter the time formerly required, and without rain. No patient who has had teeth filled in this manner once, will over willingly consent to the use of excavators or burragagin.

We have also recoived an immense quantity of the most beautifully carved Artificial Teeth, comprising thousands of different shades and forms, from which with our long practical experience we can match any atyle or feature, complexion, or expression, with such artistic incenes that detection is impossible.

The Plate we use for the atmospheric pressure is the Whalebaso Rubber, the lightest and strongest kn wa.

We have been using Nitrous Ocide Gas

20,000 Times, 2,140 times in this City slone, since August
1872,
And recommend it as the rafest anesthetic
nown. It is nothing new, as it has been tested
by thousan's of Demists, and hundreds of
thousands of people.

Persons from the Camp and neighboring
Towns, can have their Sets of Te th made in

NEW ADVERTISEMENTS TELL US WHAT CMRED YOU ?-Tire to death. When the sick die, every tode can tele what they died of. Is it not right, then that when the sick recover, all the world should that when the sick recover, all the world should know what cured them? And yet thouands are cured of deadly ilis by Bristol's Sarsaparilla, whom the public never hear. Cases that ar proach the sublimity or mulac'es—such as that of the boy, James Wyckoff, who was literally wrenched from the jaws of death, when more than half devoured by scrofula—of course find their way into print. Perhaps a bundr d such he e startled accept through the relumns of leding jurnals and midical periodicals. But Bristol's arrangerilla has wrought thousands aye, it is not thousanly, of cares, after his claims had that in their heads and said. "no hope." Everywhere, at all leas in, it is salent yworking wond ra. Would that, for the sake of humanity, the whole truth in relation to its properties were universally known. As a rule, Bristol's Sugar-coated Polis should be used a the same time with the Sarsaparilla. They take the same time with the Sarsaparilla. They take off from the system the diseased humors secrete:

ARGENTINE METEOROLOGICAL OFFICE

REPORT OF THE DIRECTOR FOR 187 To H. E. Dr. J. C. Albarracin,

Minister of Justice, Worship and Public Instruction.

The Meteorological Office, organised by Congress for the purpose of attaining an accurate knowledge of the climate and atmospheric laws, which prevail throughout the national territory, was nominally established on the 1st which we desire. And similarly, if Dec. 1872. On that day the prepara- from those comparatively few disintory measures of its organization commenced, and at the expiration of three months from that time I had the honor of presenting to his Ex. the Minister a time or means permit, we imperil all statement of what it had been possible to accomplish in that brief interval, indicating at the same time the policy tions indicated in my previous report which seemed to me most judicious have acquired in my mind additional for the efficient and economic attainment of the important objects in view.

The law assigned a certain amount for the acquisition of instruments, and for the indispensable outlays attending the collection and study of the ob Sunday, 22d inst, servations, relying for the observations themselves upon the scientific tastes servations, relying for the observations and generous impulses of lovers of nature in the various parts of the wide taking was confidently anticipated this anticipation has been thoroughly justified by our subsequent experience; and the number of persons, who have signified their willingness to contribute to the progress of science and the development of the national resources. by gratuitously assuming the onerous duty of maintaining regular observations three times a day, would do honour to a far more populous nation. The task of maintaining observations without fail at stated and often inconvenient hours is by no means a light one; and a strong motive is needful to animate the observer to a long continuance of these systematic observations. Love of science, love of country, and an earnest desire for usefulness are the only motives to which we can appeal, and these have thus far

> The principles which should guide the institution during the first years of its existence, and by which I have endeavored to shape my course in its management, are simple.

abundantly sufficed.

The object first in view is to obtain s knowledge of the temperature, barometric pressure, winds, rains, atmospheric moisture, and other meteorolo. gical facts for as many points of the republic as possible; from the torrid zone on the no th to the farthest southern limit, and from the Andes to the Atlantic. We must know, in the secure and solid form of numerical data, their average amount, both for the year, and for the various seasons, as also the frequency and extent of the Whatever changes take place in the and finally that of their collation, study

In the discussion which followed the affording an opportunity for great ween the two great river systems of promptitude. And in France, also, I | the La Plata and the Amazon was such had hopes of being able to make some that it was possible some connection arrangements by which we could ob might be formed between them. or tain at reasonable prices instruments whether there was anything in that part of the world corresponding to the phenomenon known as bifurcation; connected the Orinoco and Amazons

Mr. Bates replied that he believed there was no instance known of biturcation connecting the tributaries of the watershed between the Paraguay and pass from one river-system to another, but no regular commerce was carried on in this way. Of course canals might be constructed at very little expense. The highest elevation of the watersheds cannot be more than 1,000 countries became peopled there can be no doubt whatever that canals would be made connecting the rivers, or avoiding rapids, so that a vast system of internal navigation would be completed throughout the whole of interior

Sir Harry Verney said that fifty years ago Sir Woodbine Parish told him that the Spaniards, the Brazilians, and the Poruguese had ascended the rivers and fought battles in those very marshes to which Mr. Bates referred. There could, therefore, be no doubt mately be able to find its way through-America.

The Chairman, in summing up, said that Professor Levi's paper was one that did not contain merely dry geographical or statistical details, but dealt in a liberal spirit with the whole subject. He would commend that manner of treating a country generally to the Fellows of the Society. Dry journals of travels which were very valuable for their geographical details, were not so generally interesting as a paper like that which Professor Levi had just read. Brazil and R.P. Mail.

# EDITOR'S TABLE.

The first news in town yesterday the Secretary from Mr. Forsyth, the day morning was from England, by Envoy to the Atalik Ghazi, dated at the steamer Bonita, which brings dates Shahid ulla; and Sir Heury Rawlin to the 13th ult from Loudon. The Conson observed that if Mr. Forsyth suc servatives are going ahead like wildceeded in reaching Aksn and fixing its fire, their majority of seats won on position, he would have performed a the 13th being 60. The other news is teat superior to that of any traveller not important. The fortunes of both who had yet ventured into the wilds sides in the civil war in Spain vary daily. MARRIAGE. On the 15th March, by the Rev. Mr. Griese-nann, of the German Church, Friedrich Hartz, o Carl ta Irving, née de Orellana.

Elections

Here, as in England, the pe ple are engazed in the exercise of that first most no le privilege of a free nation. On both sides of the A lantic the great error seems to be the adoption of physical force. Brandy, and not revolv re, should be used. The reason. is very clear : totting up polls, not breaking horde, wins the day; therefore invite your friends to tot, tot yourself, and remember
