STIMULAT THE FALLING HAIR.-If STIMULAT THE FALLING HAIR.—If your hair is thinning, there exists the germs for another growth, which requires a stimulant to bring it through the epidermis and produce luxurious tresses. Apply the triental Tonic often, using the hair brush vigorously, in ord r to excite the absorbing pores, so that they may receive it and its effects will prove beneficial. The experience of all those using the Tonic is, that it not only strengthens and longthens the hair, but also increases it. In warm climates, where lades inadvertently have recourse to deleterious oils, it will be found superior to any other article to dress the hair, imparting to it lustre, clasticity, and beauty. "The Superb, the latest monster vessel of the British navy, is an iron built broad-side ship, having a load displacement of 9,800 tons, and enhorse power. Her estimated first cost is £418,000. The Fury, which will likely be launched in October next, has a load displacement of nearly 11,000 tons, and is to be a turret-ship, with work up to 8,000 horse power, and her cost exceeds that of the Superb, being as much as £457,000. Any class, fifty dollars for eight dolay or doubt the directors must understud what they do not at present realize, that exchange is of all commodities the most fluctuating, not even public stocks oscillate so frequently as exchange. A telegram about any of our pracipa exports may cause the bils that were enquired for at 49 pence in the morning to be rejected by noon at 49]; or a failure in Europe would in w minutes completely alter the phase of our exchange market. In fact, so numerous are the influences at work that it appears invidious to cite any in particular. Tako also into acc unt the difference of credit, as witnessed last mail, when a bank took £30,000, at 491, drawing the same day £18,000, at 484, and a glimpse of the intricacy of exchange becomes apparent This delay or uncertainty should be avoided Yesterday a firm applied to the Provincial Bank for £10,000 exchange at 49 pence, and while the decision was pending first class paper was offered to the firm at 49%, but having already asked for what they required, this last more advantageous proposal was refused. Later on the Directory only granted £5000 of exchange to the firm, who now rushed to the 49% drawer, but the bills were passed; thus the firm found it a losing business to have exchange transactions with the bank Again a telegram was received yesterday at 2 clock requiring a remitt nee to Europe by the Liffey; off rushed the broker to the Provincial Bank, to find that no answer could be given within twenty-four hours. These are defects of management, and easily remedied; by their existence it is evident that the Directors do not know the impediment they place both on their own interests and those of the commercial public. To put it plainly, let us suppose the t legraph complete between this and Eu.ope, and an answer will be obtained quicker from London or Paris

The mails from Montevideo this morning brought up the news of another hegira in the money line; all that we know of the affair will be found in our Montovid an letter. The Mayan failure it seems is susceptible of an arrange neut provided Montevidean st cks hold up; this is rather good news for the creditors. In fact from amount of the stock has not added one farthing all that we can gather the whole Montevidean market to a certain extent hinges up a stocks keep ng up, and to effect this the only element is the new London loan. Gold go s down as freely as ever from this market to Montevideo; one hundred thousand pounds per week seems to be the average, this is a very great drain on a money market such as ours, nevertheless exchange keeps up so in the Mount that the gold must go forward for takers find a better e- change down there than here, and if as it is said on the alteration of the loan law the Minister will have power to draw on Messrs. Thompson, Bonar and Co. then we may expect to see the shipment of gold to Montevideo continue throughout the

> The news from Santa Fe to-day is not favorable: no less than three of the colonies close to the city of Santa Fe are broken up. Over onthousand colonists have been compelled to leave their farms, owing to the unprotected state of the country out there, the inroads of the Indians, &c. When we take into account the fact that one of these colonies is within nine leagues of Santa Fe, we can judge of the very scandalous neglect of the authorities. Years, and long yours it will take to bring these 1000 agriculturists back to their now broken up homesteads. The orror is, indeed, a grave one, and some one should be held responsible. Parti s with Sant Fe business connections blame the Government of that province for the whole aff .ir, which with but a little precaution might have been avoided. Owing to Mr. R. J. Runciman's departure for Europe he has given full powers to Mr. Edward Barnes and Mr. William Orr to sign by joint. procuration the firm name Gui lerm R. Gilmour & Co. during his (Mr. Runciman's) absence.

So much interest is taken in this market about the Montevidean loon that everything bearing on the matter is important. The following remarks from Dr. Cornac's new paper Los Intereses Estrangeros, published in Montovideo, are importent :- The Revista Mercantil published on 26th the following bulletin-" The Minister of Hacienda has just informed us that the loan is done Dr. Perez Gomar brings in his pocket the loan contract signed by Messrs. Thomp on, Bonar & The Minister received per Erymanthe at official despatch stating that a contract 'al re ferendum' had been signed with a London banking house. The contract'is based upon the terms of the loan law, but there are some modifications that must be made by the Logislature; upon the approval of these modifications the loan will be launched on the London market which will be about September or October, that is to say, five months or so to launch the loan, and 8 months to get the proceeds. We all much desire the revisation of the loan, but it is just as well people should know how the business stands, and not to remain with their mouths open expoeting sovereigns to fall from the clouds. Vital questions have to be first settled, and free emission stands first. We must not place reliance on mere probabilities. We hold a letter ourse vedirect from London dated 20th April, and from a man intimately connected with the commissioner, who says-The loan is not dom, nor for the present will it be done, but there are probabilities of its being done about the end of this year or beginning of next. THE

Glorious 25th of May Is again come round, and with it all is joy and gladness. Argentines, with natural p ide, claim it as their own, but Otard and p ide, claim it as their own, but Obrd and Duruy, taking a broader view of it, regard it as an "international feast." On this day, so to speak, there was an increase in the family of nations. Young Argentine grow up well, and on thi, his 65th birthday, it is our pleasing duty to drink to his health in a null flowing bumper of the "Matceless Brandy."
