

The four 'trouades' about which so much fuss has been made are now expected out very shortly. They are all wretchedly small potatoes, grubstubs, only costing \$21,000 each. They will come out in pieces, and be put together here. Even Banda Oriental need not be afraid of this formidable fleet, so long as she has the Coquiabo, with its officer and crew of one man and a boy cook.

CRICKET.

CONCORDIA V. SALTÓ.

On the glorious 25th of May the above eleven had a tip-top set. The weather was most favorable, and on the morning of 25th the Concordia team crossed over to Salto, and were warmly welcomed by the hospitable President and members of the Salteña C.C.

The players were encouraged by the presence of the fashion, youth and beauty of both banks of the river, and the wickets fell to slow music melodiously discoursed by the boys of Hardy's works.

ask the same question, and all the unfortunate holders echo the interrogatory. But the real inspirator against the stock is the money market; with money at its present rates it is absurd to talk of maintaining prices. Seven hundred thousand 'Cedulas' 'effectives' are already sold for the end of the month; if this stock is delivered where is the money to come on to pay for same.

The new Provincial Bank project that we mentioned in our last, proved quite a fizzer in the market. To restrict the Provincial Bank to 100,000 pats. in its discounts to any house or firm would be impossible at the moment, since all the bills maturing must be renewed unless the wish is to sweep the whole market, and the bank itself would be the chief loser.

Mr. J. A. Rken, one of the Montevideo managing partners of the leading firm of Zimmerman, Fair & Co., took leave of his friends on 'Change to-day. He goes to-night to Montevideo, and will take the Nova there for Europe. We hope to see him soon return.

It is admitted on all hands that the Government guarantee is merely a matter of form to please investors in England, and that the high rate of interest will soon make this scrip very popular on the London Stock-exchange.

We observe with pleasure that various Provinces of Brazil have asked permission to establish Mortgage Banks, in view of their great help to agriculture. Mr. Bablin's Memoria touches on the project for opening an agency in London in the following terms: 'Up to the present there is plenty of disposable money in the country to be put into Cedulas, as we see by the quantity of private capital still sunk in mortgages.'

'First of all emancipate our Bank from all dependence on the Provincial Bank. If the latter cannot open a credit in London without depositing Public Funds how can we expect our kindred towards its offshoot, the Hypothecary Bank?'

'The solution is easy. Give our Cedulas the guarantee of the Province, as in Provincial Public Funds. Let the Legislature declare that it warrants the company and authorization of Cedulas, just like Public Funds.'

The balance sheet of the Provincial Bank for the month of May shows that our assertion some few weeks ago that gold was flowing back to the bank was correct; the gold on hand shows a notable increase. The figures become more interesting when compared with the previous month.

The new salvage company about to be established in Montevideo is provoking great discussion there. Captain T. Deonam, the proposed concessionaire, in a letter referring the attacks in the papers, points to the enormous salvage charges which have to be paid in Montevideo, and gives the following list of salvage paid, viz:—

'The year's profits and savings of the public will not all go to an increase of production; a great portion will become floating capital, such as Bank deposits, and in many cases the owners will buy Cedulas instead of putting their money in Bank. But the time will doubtless arrive when the demand for money will be increased by the spread of immigrants over our lands that now lie idle, and we must always keep a long look ahead.'
