Having received several very important improvements in the art of cleaning and excavating decayed teeth, preparatory to filling, which does the work with such rapidity and beauty of execution, that in a very few seconds an otherwise sensitive tooth is prepared for the Gold in a manner unattainable by the disservice method of scraping and burning, so well known by those who have experienced the operation.

Also Green's Electric Engine, which took the grand Diploma of Honor at the Vienna Exhibition. The fact of harnessing the lightning in a fairly good in this neat, efficient, and truly wonderful little machine. By its use we manipulate the gold into the most difficult of frail teeth, with the most exquisite exactness, and without danger of fracturing the most delicate enamel. Then, with the same engine, we finish and polish the filling in less than one quarter the time formerly required, and without pain. No patient who has had teeth filled in this manner ever, will ever willingly consent to the use of excavators or burr-grains.

We have also received an immense quantity of the most beautifully carved Artificial Teeth comprising thousands of different shades and forms, from which our long practical experience has selected the most perfect, and the most complete, or expression, with such artistic incisions that detection is impossible.

The Plate we use for the atmospheric pressure for the painless Extraction of Teeth for nearly forty years, and have had—

20,000 Times, 2,110 times in this City alone, since August 1872.

And recommend it as the safest anesthetic known. It is nothing new, as it has been tested by thousands of Dentists, and hundreds of thousands of people.

Persons from the Camp and neighboring Towns, and who have styles of rubbing in time to return same day, by making an appointment before hand.
